

Internal Reviews

Performance Period July 2005-September 2005

Introduction

No reviews occurred in the quarter. During this period, Integrated Internal Review training was conducted in the following 17 complexes, including the 27 charter schools. Kalaheo and Castle complexes have rescheduled their trainings to the Second and Third Quarters respectively. Leilehua, Waianae, Nanakuli, and Kahuku canceled their originally scheduled trainings. The four complexes are conducting External Reviews during the Second Quarter and determined that training for internal staff was not necessary at this point in time, given that State Reviewers will be utilized for the upcoming review. At the present time, trainings for the remaining complexes will proceed as planned.

A Three-Year Review Cycle

The internal review process will continue to monitor all complexes, including charter schools, annually. The complexes and charter schools have been divided into three groups, with each group rotating through a three-year cycle. The cycle is presented in the table below. Each year, external monitors will review one group, while the other two groups will utilize school/complex personnel and mentors to conduct their reviews. The benchmark for both the external and internal reviews will be an 85% score on overall child status and system performance.
